Monday through Friday 8am-5pm EST.

SHIPPING CONTENT

Parts and components under 150 pounds will be shipped UPS. Transmissions and packages over 150 pounds will be shipped truck freight.

FREIGHT CLAIMS

All shipments are fully insured. Any claims for damage must be made with the delivery company at the time of delivery. Do not return damaged freight to Performance Automatic unless prior arrangements have been made. Please inspect merchandise upon arrival. All returned merchandise must be accompanied by a copy of the invoice and a return authorization number.

MERCHANDISE RETURN

No merchandise will be accepted without permission from Performance Automatic. All returned merchandise must be freight prepaid. No collect shipments will be accepted. All returns subject to a 20% restocking fee.

FORD C4 PERFORMANCE TRANSMISSIONS

www.PerformanceAutomatic.com

C4 SUPER STREETER TRANS

Performance Automatic C4 Super Streeter is a great transmission for those enthusiasts who need a reliable performance transmission that will handle 450 horsepower.

PA26101 C4 70+ Super Streeter Case Fill

PA26102 C4 70+ Super Streeter Pan Fill

C4 COMPETITION TRANS

Performance Automatic C4 Comp trans is a durable racing transmission that can also be driven on the street. Our comp transmission comes with our reverse manual valve body and is rated for 750 horsepower.

PA26103 C4 70+ Comp Trans Case Fill

PA26104 C4 70+ Comp Trans Pan Fill

C4 PRO STREET TRANS

Performance Automatic Pro Street Trans is rated for 750 horsepower and can still be put in DRIVE to shift itself! Perfect for those who have big inch, high horsepower street machines and have enough vacuum to shift on its own.

PA26110 C4 70+ Pro Street Trans Case Fill

C4 SUPER COMP TRANS

Performance Automatic Super Comp transmissions have been to the winners circle many times, so if you want proven round by round performance and a trans that is rated to 1000 horsepower, this Super Comp is the one for you! Available with or without transbrake valve body.

PA26106 C4 70+ Super Comp with Rev Man VB & Transbrake Pan Fill

PA26107 C4 70+ Super Comp with Rev Man VB & Transbrake Case Fill

PA26108 C4 70+ Super Comp with Reverse Manual VB Case Fill

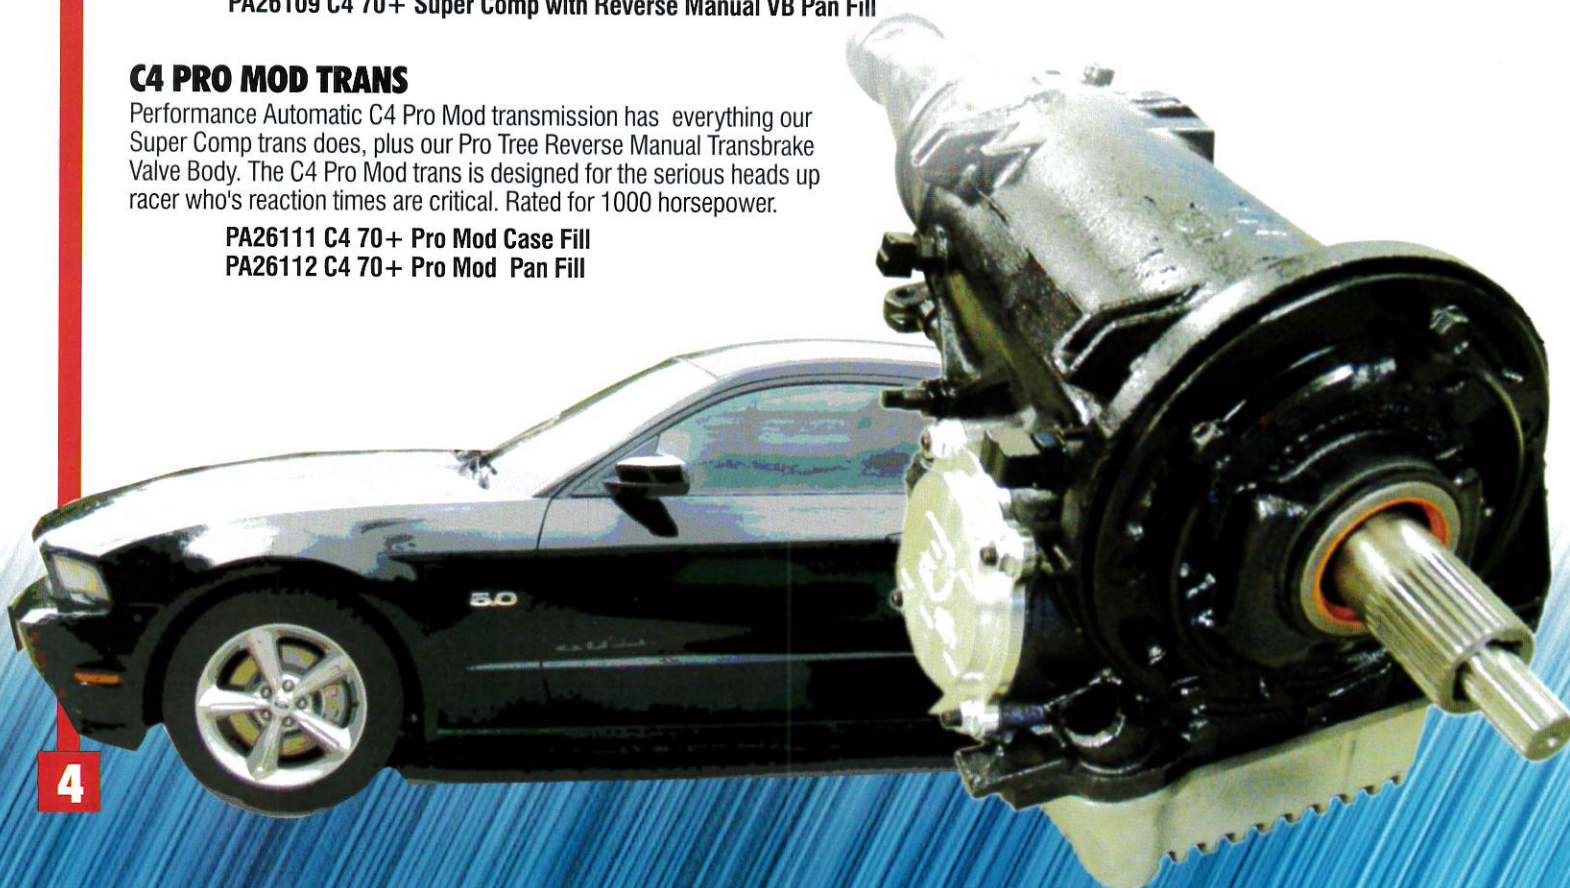

PA26109 C4 70+ Super Comp with Reverse Manual VB Pan Fill

C4 PRO MOD TRANS

Performance Automatic C4 Pro Mod transmission has everything our Super Comp trans does, plus our Pro Tree Reverse Manual Transbrake Valve Body. The C4 Pro Mod trans is designed for the serious heads up racer who's reaction times are critical. Rated for 1000 horsepower.

C4 STREET SMART SYSTEMS

www.PerformanceAutomatic.com

Performance Automatic has a C4 Street Smart System for all Small Block Ford engines, 289-351, FE engines 390-428, Big Block Ford engines 429-460 and 4.6-5.4 Modular and Coyote 5.0. We have a package designed for your specific application whether it is a Muscle car, Street Rod or Pro Touring vehicle.

All our packages start off with our C4 Super Streeter transmission and then we add our Power Planet and hardened input shaft, this trans can handle the power! Most packages have our Pro Fit bellhousing, lock top dipstick and filler tube, an 11" Street Smart torque converter and complete hardware kit. Now is the time to replace that old C4, C6 or FMX and feel the advantages of a Performance Automatic Street Smart System with a "Lifetime" Warranty.

AOD TRANSMISSIONS & AOD STREET SMART SYSTEMS

www.PerformanceAutomatic.com

Direct replacement or
upgrade for all 1986-93
Mustang 5.0

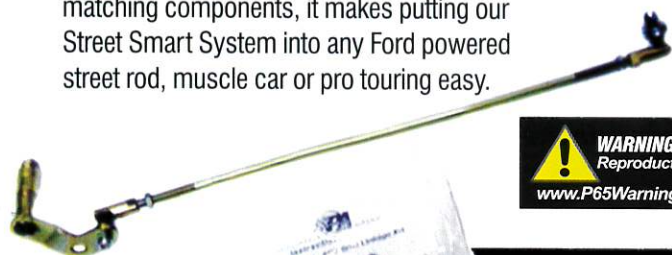

AOD TRANSMISSIONS

First offered in full size Ford cars and trucks in 1979, this transmission quickly found its way into the ever popular 5.0 Mustang. Plagued with soft shifts and a lock up converter, the AOD was not originally designed with performance in mind. Performance Automatic recognized the full potential of this trans and quickly went about redesigning it from front to back. What emerged was a trans that could handle more horsepower and torque than was originally thought. Performance Automatic also recalibrated the clutch and band application ratios to provide firm, positive shift characteristics.

AOD STREET SMART PACKAGES

Our AOD transmission is a proven winner when it comes to a non-computer controlled 4-speed overdrive and combined with a complete set of matching components, it makes putting our Street Smart System into any Ford powered street rod, muscle car or pro touring easy.

AODE/4R70W ELECTRONIC OVERDRIVE TRANSMISSION

www.PerformanceAutomatic.com

AODE/4R70W SUPER STREETER

Performance Automatics AODE/4R70W Super Streeter transmission is a great performance replacement transmission for any vehicle that was originally equipped with one. Rated to handle 500 horsepower, these Super Streeter transmissions can handle the power and can be driven everywhere. One year warranty. Please note these units are model year specific.

4R70W SUPER COMP TRANS

Performance Automatics 4R70W Super Comp transmission is our highest horsepower rated overdrive transmission. Rated to over 950 horsepower, this 4R70W has been proven on the Hot Rod Power Tour and Drag Week numerous times. Performance Automatic developed a street able full manual transbrake valve body that has rocked the competition. No need for any trans computer with this 4R70W. Overdrive and lock up are controlled by simple toggle switches. One year warranty.

AODE/4R70W COMP TRANS

Performance Automatics AODE/4R70W Comp transmissions are designed for those who need to upgrade their current AODE/4R70W transmission to handle the extra horsepower. Rated to 650 horsepower, superchargers, turbos or nitrous are not a problem for our Comp trans. One year warranty. Please note these units are model year specific.

BLUE CHIP 4R70W STREET SMART PACKAGE

www.PerformanceAutomatic.com

Performance Automatic takes a state of the art approach to putting a "Ford in a Ford" for those who choose the new "5.0 Coyote" engine, or a Ford Small Block, Big Block, Modular and FE engines. Performance Automatic has created a sophisticated Ford 4R70W Street Smart System to partner with any of these engines. Our packages come complete with our Street Smart 4R70W transmission, the MSD Atomic stand alone transmission controller that's user friendly and is "no lap top required", custom torque converter, dipstick, filler tube and complete transmission wiring harness. Complete with all the matching components you will need. These 4R70W Street Smart Systems will handle 650 HP. Will work with electronic or mechanical speedometer. 3 year warranty.

Optional carb kit adapter PA99111 plugs into MSD controller.

FORD 6R80 TRANSMISSIONS

www.PerformanceAutomatic.com

6R80 TRANSMISSIONS

The 2011 and newer Mustangs came equipped from the factory with the durable 6R80 6-speed transmission. This transmission quickly became the workhorse for most F-150s and other rear wheel drive vehicles. Oversized clutch packs along with a durable gear set allows this transmission to handle some reasonable power when managed correctly. Performance Automatic is the first company to offer the 6R80 trans in a stand alone configuration. A first gear ratio 4.17 to 1 gives excellent off the line performance and still delivers a .69 to 1 overdrive ratio for low cruising RPMs.

PRO FIT BELLHOUSINGS

www.PerformanceAutomatic.com

For over a decade, **Performance Automatic** has produced an incredibly versatile line of Pro Fit Bellhousings. The first in this series was the Pro Fit small block Ford PA26577. This unique bellhousing is cast from a high strength aluminum alloy and is SFI 30.1 certified. What makes this bellhousing so unique is that it is part of the Performance Automatic Pro Fit System. This bellhousing is CNC machined to accept the 157 tooth and 164 tooth flexplates and starters thus eliminating any guesswork for the retailer and end user. A case fill or pan fill C4 transmission can be used with this bell and all hardware is included. Performance Automatic did not stop there. We have expanded the line over the years to include a much needed 4.6/5.4/Coyote, FE 390 427 and big block 429/460 Ford bellhousing. These bellhousings are designed to use the factory starters and flexplates as well. All bellhousings are in stock and ready for delivery.

VALVE BODIES

www.PerformanceAutomatic.com

STREET STRIP VALVE BODY

The Performance Automatic street strip valve body is designed for everyday street driving and weekend trips to the drag strip. Automatic shifts in the drive position and will hold first and second gear manually (C4, C6 and AOD hold valve bodies only). Tire chirping shifts when you want it. This valve body, which is featured in our Super Streeter transmissions, is a direct bolt in with no other modifications required.

TRANSBRAKE VALVE BODY

When you have the need to leave the line hard, Performance Automatic's transbrake valve bodies are second to none. Bring the torque converter up to maximum stall speed without the worry of creeping through the lights. Leave the line with confidence and a great reaction time. Performance Automatic's transbrake valve bodies are complete and ready to install. Most of our Super Comp transmissions include this top of the line valve body.

REVERSE MANUAL VALVE BODY

With Performance Automatic's full manual reverse pattern valve body, you are in total control. Designed with competition in mind, this valve body has completely re-engineered fluid circuits which provide the best shifts possible. Our "no-flare" reverse manual valve body is also a direct bolt in and is featured in our C4 and C6 competition transmissions.

AODE/4R70W FULL MANUAL PRO TRANSBRAKE VALVE BODY

Finally, full control without the computer hassles. Performance Automatic totally redesigned the fluid circuits to eliminate the inconsistent computer operations. Now the advantage of the AODE/4R70W transmission can be accessed by those racers without the computer. First, second and third gear is selected manually with fourth (overdrive) on a separate switch. No more waiting for the computer to shift, move the shifter and you are there. Torque converter lock up can be manually selected or activated by a timer.

SHAFTS, SERVOS, CABLES

www.PerformanceAutomatic.com

HARDENED INPUT SHAFTS

Built for strength, designed for competition and trusted for its reliability, the hardened input shaft from Performance Automatic is a welcome addition no matter what your application. Custom forged from 4340 non twisted steel produces the toughest shaft around.

C4 PRO SHIFT SERVO

Designed from the ground up, Performance Automatic developed a billet aluminum servo cover employing a permanent "lip" type seal to conform to various transmission case bores. Minimal transmission fluid is used in the 1-2 and 2-3 shift ensuring positive shifts, extending clutch and band life a greatly reduces 2-3 flare up.

FLEXPLATES

www.PerformanceAutomatic.com

PLATINUM EXTREME SERIES - SFI APPROVED

Performance Automatic's Platinum series flexplates are engineered to handle extreme duty applications and designed to take the punishment of today's high horsepower engines. The 4mm thick centerplate provides a solid foundation for these new designs. Ring gears are precision welded to meet SFI specifications, utilizing robotic machinery and cold welding process. Performance Automatic's Platinum Xtreme series are rigorously inspected throughout the manufacturing cycle to ensure that our customers received the quality they have come to expect from Performance Automatic. These flexplates are designed to accommodate various size torque converter bolt patterns and they work with our Pro Fit bellhousings.

TORQUE CONVERTERS

www.PerformanceAutomatic.com

Performance torque converters are generally grouped by size (diameter) and stall speed. As the diameter of the torque converter decreases, the stall speed (RPM) goes up. Most of the factory torque converters are 12-13 inch diameter and have a stall speed around 16-1800 RPM. The problems arise when modifications are done to the fuel system, camshaft, or other engine control systems. Smaller diameter converters are needed to provide more slip at idle. This allows engines with a lot of camshaft to

idle better. As the torque converter and horsepower range is moved higher through the RPM range, the smaller torque converters with their higher stall speeds provide maximum torque multiplication where needed. Also the same torque converter will react differently when used behind different engines. So make your torque converter selection with the help of qualified personnel. Performance Automatic has endless converter combinations to make your car or truck perform to its utmost potential.

"Most problems that occur with C4 transmissions start with mismatched components."

It's important to understand that torque converter, bellhousing and flexplate must all be integrated to prevent installation errors. This can be accomplished by speaking to an associate that specializes in this area.

GM TRANSMISSIONS

www.Performa

Whether you choose a 3 speed or a non computer controlled overdrive, Performance Automatic has the transmission or Street Smart Package for you. Starting with the best cores available, Performance Automatic works its magic with reworked shift calibrations, upgraded clutches, plus many other improvements. Our transmissions are great replacements for your tired and worn out stock units. New project or upgrading? We have the Street Smart Package for any Street Rod, Muscle Car or Pro Touring Vehicle. All Street Smart Systems come complete and are ready to install. Superior components and a great warranty make these packages the best in the business.

Performance Automatic has made it easier than ever to install a GM electronic overdrive transmission into your muscle car, street rod or pro touring vehicle. We build 4L60E transmissions for the conventional small and big block Chevys as well as 4L70E transmissions for LS based platforms. Whether you need just a transmission, a Street Smart Package without controller, or our complete Street Smart System including the MSD Atomic Controller, we have you covered. And for those that need that little "extra", our new Street Smart Pro Series is rated to 650 horsepower! Strength, easy installation and the quality you have come to expect from our Street Smart Systems. No stretch of highway or interstate is out of your reach with electronic overdrive and lockup capabilities from Performance Automatic.

SUMMARY OF THE LS/LT ENGINE

www.PerformanceAutomatic.com

TIMELINE

The Chevrolet LS engine debuted in 1997, referred to as the Gen III platform. Truck engines were steel block based and Corvettes and F-body cars were aluminum block based. Engine sizing in trucks consisted of 4.8, 5.3, 6.0 and 6.2 liter. Car engine sizing consisted of 5.3, 5.7, 6.0, 6.2 and 7.0 liter. 2005 yielded the Gen IV offerings of the LS2, LS3, LS9 and the supercharged LS7. 2014 brought the Gen V version now called the LT, which found their way into the C7 Corvette Stingray as well as trucks and SUV applications.

CRATE ENGINES

Chevrolet performance has offered numerous engine combinations based off production LS platforms as well as the LSX crate engines, which include LSX376-B8, LSX376-B15, LSX454 and LSX454R based on the LSX block.

LS FACTS IN REGARDS TO TRANSMISSIONS & COMPONENTS

Now the information that is important in regards to transmissions, torque converters and flex plates. Most LS crankshafts are a 6 bolt flange design in regards to flex plate mounting. The LSA, LT1, LT4 and LSX454 are 8 bolt mounting. Only the LS9 as of this printing is a 9 bolt mounting. The majority of factory LS applications used a "dished" flexplate, with only a few trucks in 1999-2000 using a flat flexplate due to differences in the length of the back of the crankshaft. These few exceptions are referred to as "long" crankshafts, where the majority of LS production engines are referred to as "short" crank shafts. The "short" crankshaft LS engines are roughly .400" shorter than the conventional small block and big block chevy engines, thus the "dished" flexplate to align the teeth with the starter and its existing mounting points. The following is the converter bolt circle on the flexplate as it pertains to each transmission family-LS style 4L60E has a 11.066" diameter pattern

TH400 and 4L80E has a 11.5" diameter pattern TH350, 700R4, and lt style 4L60E offerings has a 10.75" diameter pattern GM sells an adapter spacer that mounts on the rear crankshaft flange that will properly align a 4L80E transmission and a "flat" flexplate, also offering proper support for the torque converter pilot. LS torque converters have a pilot that extends .600" past the mounting pads, where as a standard non LS converter is only .250" past its mounting pads.

It is crucial that all measurements are double checked before ordering parts, as interchangeability from the factory over the past 20 years as well as aftermarket parts used in many builds may lead to compatibility issues. This information was compiled with references from the Chevrolet Performance catalog and leading LS internet based websites.

ACCESSORIES

PERFORMANCE AUTOMATIC

www.PerformanceAutomatic.com

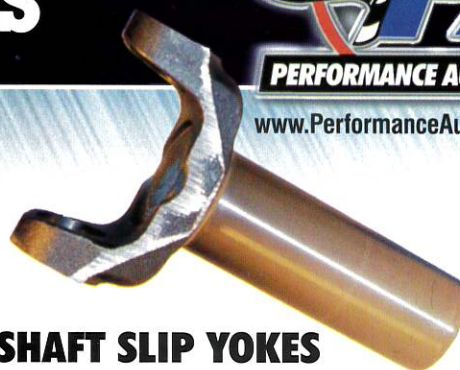

TRANSMISSION CROSSMEMBERS

Adding to its line of automatic transmissions and components, Performance Automatic is proudly offering automatic transmission crossmembers to fit a variety of popular 60's and 70's muscle cars. Engineered and designed specifically to install a modern day overdrive transmission in 60's and 70's GM street machine and 67-73 Ford Mustangs. Each crossmember is laser cut from structural steel MIG welded and powder coated, so it looks as good as it is strong. Check our extensive listing at www.PerformanceAutomatic.com in the Parts and Accessories category.

TRANSMISSION COOLERS AND COOLER KITS

Performance Automatic is offering a variety of transmission coolers and cooler kits. These kits are available for Ford and GM transmissions. A step up from the fin and tube type coolers, our plate and fin coolers feature strong furnace brazed construction, embossed turbulators which maximize heat transfer while also minimizing pressure drop. Very popular with muscle car enthusiasts and street rodders for use on their vehicle for just cruising or taking that long trip to a car show. It greatly extends transmission life by preventing heat-related transmission failures and improves shifting performance. We offer 5, 9 and 15 row coolers with GVW ratings of 14,000 lbs. and up, so we have the correct cooler for your application. The 15 row cooler comes with an electric fan so it will keep your transmission cool in extreme conditions. Perfect for autocross or road racing. All kits include 11 feet of steel braided or performance engineered line which you can easily cut to the exact length you need. Plus, we supply all the proper fittings and hardware made for either your GM or Ford transmission.

DRIVESHAFT SLIP YOKES

The driveshaft slip yokes we now offer are designed to compliment all of our Street Smart Systems. All of our drive shaft slip yokes are made from forged steel and designed to exact OEM specs. These new yokes are much stronger than stock, made in the USA and they accept the common u-joint.

SERVICE KITS

Keep your transmission in the hunt with these filter and pan gasket sets. High flow filter combined with Duraprene gasket make changing transmission fluid a snap. Keep a spare kit in the garage or trailer for that critical time you need it the most. Performance Automatic service kits, maintenance made easy!

BUSHING & WASHER KITS

Insure correct planetary, clutch and drum alignment with these bushing and washer kits. Often overlooked, these kits will provide proper transmission oil control and retention round after round. Don't forget, with every rebuild, replace washers and bushings and have the confidence to go to the final.

WARNING: Cancer & Reproductive Harm
www.P65Warnings.ca.gov

All the stuff you need when you need it! Each Smart Pack is transmission specific, so the parts you get are the parts that will fit your application. All Smart Packs include; hardware, block plate or dust cover, dipstick and filler tube, trans mount and a trans cooler with steel braided lines. Depending on your trans, you may also receive a TV cable, shift linkage or vacuum lines. Smart Packs for all electronic transmissions come complete with the MSD Atomic Transmission Controller and wiring harness. The Smart Packs are designed to work with any make transmission, no matter where it came from. Every Smart Pack comes in one easy to order box with all the parts and pieces you need to finish your project, even an installation guide and a case of ATF formulated for each transmission. Smart Pack, just add your transmission and converter and you're done.

"PRO SHIFT E" - PA11400

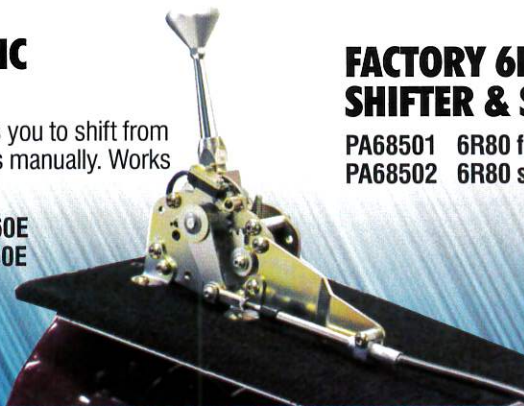

Performance Automatic has developed a simple and easy way to control the lock up on your 2004R and GM 700R4 transmission. The Pro Shift E" is completely solid state adjustable on delay timer relay. The PA11400 "Pro Shift E" lock up delay comes complete with its own wiring harness.

- 100% solid state construction
- Standard automotive relay pin format
- 12 volt 15 amp solid state output
- Compact size with panel mount bracket
- Activation ground or 12 volt
- Durable metal case

LOKAR AUTOMATIC ELECTRONIC SPORT MODE SHIFTER

This floor mounted, cable operated shifter allows you to shift from drive to sport mode to "Bump" through the gears manually. Works with most after market controllers.

TRANSMISSION PANS, DIPSTICKS & FILLER TUBES

www.PerformanceAutomatic.com

Performance Automatic has a wide selection of transmission pans, dipsticks and filler tubes. All of our pans come with a built in drain for easy fluid inspection or transmission service without the mess of dropping a full pan of fluid. All pans come complete with hardware, drain plug and gasket. We also offer a variety of dipsticks and filler tubes. Our dipsticks and filler tubes are designed for accurate fluid reading and easy access, a complement to any transmission.

PERFORMANCE KITS

MAX PERFORMANCE KITS

We have assembled a line of performance rebuild kits that have the parts needed to freshen up or rebuild the most common rear wheel drive transmissions used in performance vehicles today. All the seals, gaskets and clutches you need to bring your transmission back to life.

PRO MAX PERFORMANCE KITS

Our Pro Max kits start with our hand picked overhaul kit with high performance clutches and bands then we go and add all the extra performance mods to really step up the program. We add a valve body shift improvement package, racing type clutch plates and various servos, valves, sprags and washers to make this the best kit you can buy.
