

# PAKT45702 AODE 1992-1995 Pro Max Performance Kit

Dear Customer,

Thank you for purchasing a Performance Automatic Max or Pro Max Performance rebuild kit. With 30 years experience we've assembled these kits to include the best products available today. Please consult a factory shop manual or other form of reference material when rebuilding your transmission. Factory specifications and procedures should be followed and are your best guide to a successful job. Some transmissions may require additional products due to abnormal wear and/or torque converter failure. You may want to purchase a different valvebody, planetaries, aluminum pan or other products to upgrade your unit. If you need assistance in the purchase of upgrades please contact Performance Automatic at 240-439-4650 8-5 Monday thru Friday Eastern Standard Time.

Technical questions can be submitted via e-mail to [bschmidt@performanceautomatic.com](mailto:bschmidt@performanceautomatic.com) or [erozzelle@gmail.com](mailto:erozzelle@gmail.com)
